CRKN Transformative Agreement

- Initial Conversations
- Excitement for an entirely new arrangement

CRKN and IOP – Created great opportunities previously with ebooks

- An early adopter of our ebook collections which were launched in 2013
- Made sense to propose a new journal agreement

At last, a Transformative Agreement by late-2021

- Hybrid and Gold articles
- Unlimited publications

Popular IOP Titles

Physics in Medicine and Biology

Environmental Research Letters

Classical and Quantum Gravity

Nanotechnology

Journal of Physics A: Mathematical and Theoretical

Previous IOP Transformative Agreements

- First one signed in Austria in 2014
- Now over 240 institutions in 14 countries

IOP Publishing

A guide to submitting under
your transformative
agreement

For our new agreement...

Covering corresponding (submitting) authors at all participating member institutions:

Unlimited
publishing

No validation
process

Hybrid OA
titles

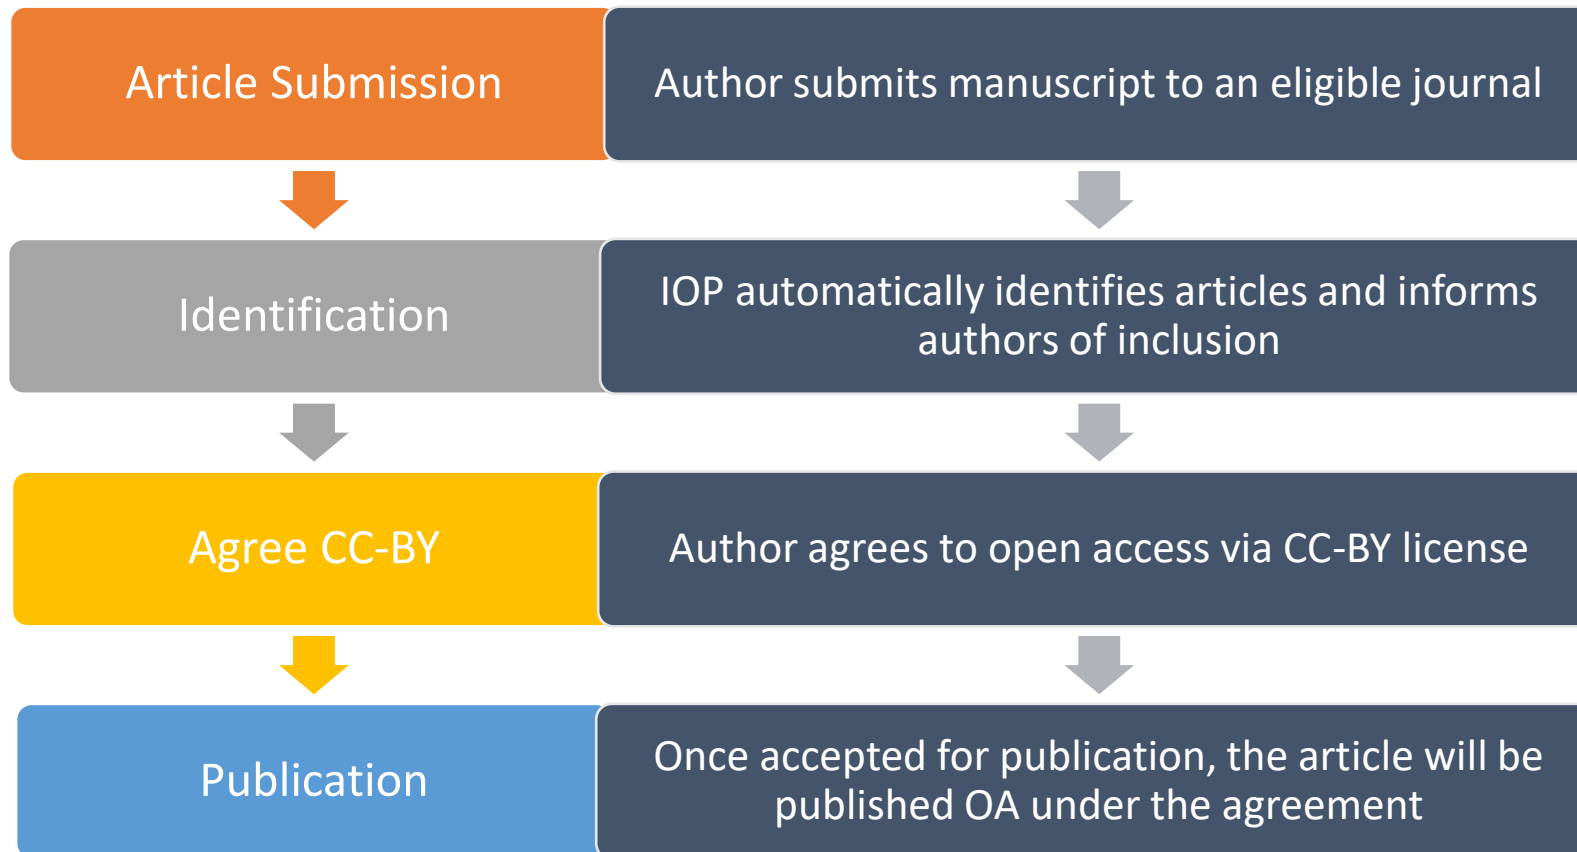

Fully open
access titles*

No OA fees
for authors

All research
article types

The corresponding author is the one that submits the manuscript, and is responsible for communicating with the journal during the submission, peer review and publication process.

The Workflow

The only thing authors need to do during the workflow is agree to the CC-BY license.

Author Guide

When ready to start the submission, follow steps 1-4 on our submission system; **ScholarOne**.

Start New Submission

To contact the journal team about a specific article please email non@iopublishing.org, quoting the Manuscript ID.

Please read the [author guidelines](#) for more information on submitting your manuscript. [Begin Submission](#)

A guide is available on our Publishing Support site.

The submission process will vary on some of our society partner journals.

Providing author information

Step 4: Author Information

Please enter information for **all** co-authors, ensuring names, emails and affiliations are accurate. **Changes to author lists after submission are only made in exceptional circumstances and are subject to approval by editorial staff.**

More advice and support on adding author information is available, including who should be listed as a co-author, how to check if your co-author already has an account, and guidance for names with Chinese, Korean or Japanese characters.

Please do not share your login details with co-authors, who will receive their own login information if they do not already have accounts with the journal.

*For papers with more than ten authors, please add information for the first ten authors.

* = Required Fields

Open Researcher and Contributor ID (ORCID) is a non-profit organization dedicated to solving the long-standing name ambiguity problem in scholarly communication by creating a central registry of unique identifiers for individual researchers and an open, transparent linking mechanism between ORCID and other current author identifier schemes. To learn more about ORCID, please visit <http://orcid.org/content/initiative>

Create an ORCID ID
Associate your existing ORCID ID

The corresponding (submitting) author will need to make sure their affiliation is clearly stated on the submission form (use the autofill) and on the article itself.

Open access choice

Open Access
This journal gives you the option to publish your article on an [open access basis](#) under a [CC BY licence](#).

Why choose open access?

- Open access articles are accessible to subscribers and non-subscribers, maximising visibility.
- Open access articles are downloaded and cited more frequently than non-open access articles on average.
- Open access publication may enable you to comply with certain funder policies.

Open Access Pricing
An article publication charge (APC) applies if you choose open access and your article is accepted for publication following independent peer review. You can visit our [paying for open access](#) pages or ask your institution/funder to see if financial support is available for open access publication.

Authors based in countries categorised by the World Bank as low income can publish open access in this journal with no APC. Eligible low-income countries (Group A) are listed on this [page](#).

Will my institution pay my fees?
We have open access agreements with institutions and funders that may cover applicable APCs at no cost to you. To see if your institution has an agreement that covers this journal, please check via our [website](#) or with your librarian. Whichever option you choose below, IOP Publishing will investigate whether you are eligible for funding and if we identify that you are, we will contact you to let you know.

*** Do you wish to choose open access for your article?**
Please supply the relevant detail to qualify for discounted rates.

Open Access Choice	Additional
<input type="radio"/> No , I do not wish to choose open access (your article will be accessible to subscribers only)	
<input type="radio"/> Yes : I acknowledge that there is an article publication charge payable if my article is accepted (unless all authors are based in low-income countries).	
<input type="radio"/> Yes : I acknowledge that there is an article publication charge payable if my article is accepted, and I will claim a reviewer discount of 10%. Enter the ID of the IOP Publishing article you have reviewed.	<input type="text"/>

Whichever OA option is chosen, IOP will always identify whether an article is eligible for the TA.

If the article is eligible for the agreement, we will contact the corresponding author and opt the article into OA via the agreement.

The selection at this stage will apply only if the article is **not** found to be eligible.

To ensure no charges occur if an article is not eligible for any reason, we recommend selecting **'No'** at this stage.

Keeping authors updated

Funding via your library may be available

Visit iopscience.org | [Read this e-mail online](#) | [Add us to your safe sender list](#)

Dear Example Salutation,

Re: "Example Article"

Article reference: Example Article Id

IOP Publishing, our publishing partner and your institution/funder have an open access agreement that promotes sustainable open access and may cover the article publication charge (APC) for your paper in *Example Journal1*.

We have therefore made your article open access to take advantage of this agreement, and it will be published with a CC-BY license. Please choose the Gold Open Access option when completing your Assignment of Copyright form.

Where any additional charges are payable for publication including, but not limited to, page charges, these remain payable by the Corresponding Author or Author's representative organisation.

If you do not want to publish your article open access, you will need to opt out prior to acceptance by notifying openaccesscharging@iopublishing.org.

Visit our [Open Physics](#) website to learn more about the ways we are supporting open access to enable wider and faster access to physical sciences research.

Common questions

[What is an open access agreement?](#)

[What is my institution or funder's open access policy?](#)

[What is a hybrid journal?](#)

[Where can I learn more about copyright?](#)

[What is a cc-by license?](#)

Please inform openaccesscharging@iopublishing.org if you believe you have received this message in error.

Yours sincerely,

After the first round of peer review, we identify eligible articles.

We'll email the corresponding author informing them of their inclusion in the agreement.

No opt-in action is needed.

The author will be asked to sign an open access copyright form and once the article is accepted it will be published open access under the terms of the institutional agreement.

Author or Librarian Questions? Contact our Transformative Agreement Manager.

The benefits of open access publishing

Get greater exposure

81%

Article downloads are 81% higher for OA articles

Comply with grant obligations

Research will comply with any funder mandates for OA

Be the word on the street

27%

Altmetric scores are 27% higher for OA articles than non-OA articles

Publish under a CC-BY 4.0 license

The most commonly used license for gold OA publishing, which has liberal reuse rights attached to it

Achieve a higher impact

31%

Citations for OA articles are 31% higher on average than non-OA articles

High-quality peer-review and production services

IOP Publishing is committed to maintaining high-value and trustworthy author and reader services throughout its entire journal portfolio

Announcing your new agreement

- A dedicated page on Publishing Support
- iopscience.org/openaccess/canada

Researchers from institutions within the Canadian Research Knowledge Network (CRKN)

IOP Publishing (IOP) has a transformative agreement with Canadian Research Knowledge Network (CRKN) to enable a transition towards open access publishing.

Current students, staff or faculty of a CRKN institution (whether full or part-time, permanent, temporary, contract or visiting appointments) at time of article acceptance can take advantage of this agreement.

For articles accepted from 15 December 2021 onwards, all eligible articles can be published on an open access basis at no cost to authors. All IOP and many partner journals that offer hybrid or gold open access options are included in the agreement. [Click here for a list of eligible journals](#). This agreement includes journals in **List A, B, C and D**.

Please note that while the Article Publication Charge (APC) is covered, the page charge or publication fee unrelated to open access are not included in our open access agreements.

How to take advantage of the agreement

This process applies to all primary research article types, including Letters, Papers, Reviews and Special Issue articles.

1. Submission

The corresponding (submitting) author must be affiliated to a CRKN institution (listed below). When you submit your article, please supply your affiliation clearly in the article submission form for identification. Please also acknowledge any research funding if asked during submission as well as in the manuscript itself.

2. At first decision

If your article is identified you will be notified during the peer-review process or shortly after acceptance, and your paper will automatically be opted in to open access. You'll be asked to agree to the CC-BY open access licence.

3. Publication

Your paper will be published open access under a CC-BY license at no cost to you. You can share it as you wish and the article will comply with funder mandates.

If you have not been alerted before your article is accepted, please contact the journal to ensure that your work is included in the arrangement.

Institutions included

Acadia University
Athabasca University
Bishop's University
Brandon University

Great news! Your institution is participating in a [landmark transformative agreement](#) with IOP Publishing through the Canadian Research Knowledge Network.

What's in it for you?

- Publish unlimited open access articles
- Benefit from greater visibility and greater impact; IOP Publishing's open access articles typically receive 81% more downloads and 31% more citations than non-open access articles
- Publish in more than [70 journals](#)
- All corresponding authors from your institution are covered
- Articles will be published under a CC-BY licence at no cost to you*

Find out more below or take a look at the [dedicated support page](#) for further details.

[How to submit →](#)

[Find out more→](#)

Publishing under the agreement couldn't be easier; just submit in the usual way. We will identify your article if it is eligible, and let you know. For more information, see our transformative agreement [author guide](#).

We look forward to receiving your next submission.

Best wishes.

The library toolkit

Unlimited open access publishing for Canadian researchers

Available at participating member institutions
iopscience.org/openaccess/canada

Unlimited open access publishing for Canadian researchers

The Canadian Research Knowledge Network and IOP Publishing have signed a transformative agreement on behalf of participating universities in Canada to facilitate open access publishing.

Your library is participating in this agreement, meaning that research accepted for publication by corresponding authors at your institution will be published on an open access basis.

Key benefits:

- Unlimited open access publications from 2022–2024
- All corresponding authors from participating member institutions are covered (see list overleaf)
- Includes more than 70 journals
- Letters, papers, reviews and special issue articles are all eligible
- Articles will be published under a CC-BY licence at no cost to you*

Just follow these simple steps when submitting your next article:

- 1 At submission**
The corresponding author must be affiliated with a participating member institution. When you submit your paper please supply your affiliation clearly in the article submission form and in the article itself.
- 2 Identification**
If your article is identified as eligible you will be notified during the peer-review process or shortly after acceptance, and your paper will automatically be opted in to open access. You'll be asked to agree to the CC-BY open access licence.
- 3 Acceptance and publication**
Your paper will be published open access under a CC-BY licence at no cost to you*. You can share it as you wish and the article will comply with funder mandates.

*The cost of publication fees may be waived for authors from participating member institutions who are unable to pay the corresponding fee.

E-mail reader.replies@iopublishing.org or visit iopscience.org/openaccess/canada for more information.

IOP Publishing

Unlimited open access publishing for Canadian researchers iopscience.org/openaccess/canada

Your research may be eligible for funding if the corresponding author is affiliated to the following participating member institutions:

Why publish open access with us?

We understand the time and effort you put into your research. Publishing open access will mean your work will be immediately available to everyone globally, allowing you to maximize its discoverability and impact.

<p>Get greater exposure</p> <p>81%</p> <p>Article downloads are 81% higher in favour of OA articles</p>	<p>Achieve a higher impact</p> <p>31%</p> <p>Citations for OA articles are 31% higher on average than non-OA articles</p>	<p>Be the word on the street</p> <p>27%</p> <p>Altmetric scores are 27% higher for OA articles than non-OA articles</p>

This is great news! If you work in flexible, stretchable, and/or printed electronics and materials in 🇨🇦 then check out the IOP journal Flexible and Printed Electronics. We cover a broad scope of topics in this field. @IOPmaterials @IOPPublishing twitter.com/jburiak/status...

Wow - researchers from Canadian universities can publish all of their work in IOP journals open access, for free. Will seriously consider publishing with @IOPPublishing. Hope other publishers follow suit. #OA #UAlberta

A guide to submitting under a Transformative Agreement

To check if your institution is covered by a transformative agreement, go to '[Transformative and institutional open access agreements](#)' and select the agreement you think you may be covered by. Each agreement page lists all of the member institutions and eligible journals.

When you are ready to start your submission, follow **steps 1-4** on our submission system; ScholarOne.

Note: a small number of eligible journals do not use the ScholarOne submission system.

At **step 4** you'll be asked to enter author information. As the corresponding (submitting) author you'll need to make sure your affiliation is clearly stated on the submission form. Use the **autofill** to provide your institution name.

The corresponding author is the author that submits the manuscript, and is responsible for communicating with the journal during the submission, peer review and publication process.
